A CHANT'S ENCOUNTER

These protestors are all chanting but none of it makes sense. Maybe you could **pitch** in and interview them to find out what this **uprising** is about. Use the Interview button in ClueKeeper to display a microphone; that will make you totally official!

What do you hear from this group? _ _ _ _ _

When you hold the microphone graphic over the mouths of some of the protestors, they make a single-syllable sound, with each protester's sound at a different tone. Use the tones, from low to high, to order the syllables to get: VOCAL ABNORMALITY
