

DASH 4TH 2012: Apocalypse Now

The Lighthouse at Alexandria

Ten sailors are plotting their courses out of the Alexandria harbor. They start accurately, but when the wind and waves pick up their charts get a little sloppy. Still, they're able to annotate them well enough to make their final headings clear. Once they're headed out to sea, strategically spaced buoys guide their way.

Legend

- congruent angle
- right angle
- regular shape center
- equal length
