

# P1: Collecting Ingredients Part 1

Part 1 of collecting ingredients is divided into 3 parts: Lemons, Water, and Sugar. The recipe gives hints as to what to do.

## Water-Filter water of impurities

For each word in the jar, remove any letters that are also contained in the word “impurities.”

pug

lit

as

mine

rid

Looking at the left over letters which were not filtered, we see the word **GLAND**.

## Lemons-Squeeze lemon wedges

For each lemon, you can “squeeze” them by folding them in half. There is a clear letter that results on both sides of each lemon. The letters, unscrambled, form the word **IODIDE**.

## Sugar-Measure sugar in lumps

For each line, count the number of lumps of sugar. Use the number of lumps to index into the word on the spoon.

FRESH[2] = R

BOTTLING[4] = T

HIRING[5] = N

ACIDITY[3] = I

INITIATIVE[4] = T

GRADUAL[6] = A

CHILDREN[3] = I

ENTREPRENEUR[5] = E

DIVIDENDS[7] = N

Ordering the letters by the first letter of the original words alphabetically, we get **ITINERANT**.

Using the given blanks, we can plug in the indexed letters from our three answers to get

ADD\_ \_ \_ \_ \_ IN\_ \_ \_ \_ \_

All we have left to do is plug in our remaining unused letters from our 3 answers. The answer is **ADDITIONAL INGREDIENT**.
